

M. ABDUR REHMAN ARIF

Software Engineer | Python Developer | Web Developer | ML Enthusiast

Phone: 0331-6646083 • Email: abdurrehmanarif29@gmail.com • LinkedIn: [mr-abdur-rehman-arif-8785a0328](https://www.linkedin.com/in/mr-abdur-rehman-arif-8785a0328) • GitHub: [muhammad-abdurrehman3054](https://github.com/abdurrehman3054)

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate (BSCS, CGPA 3.30) and Computer Science Instructor with over 3 years of experience teaching programming and core computing. Adept at full-stack software development, machine learning model building, and robust database design. Proven track record of architecting interactive 3D simulators and predictive systems. Highly skilled in problem-solving, Object-Oriented Programming, and agile development, ready to deliver scalable solutions for local and international tech ecosystems.

TECHNICAL SKILLS & COMPETENCIES

Languages: Python, C++, JavaScript, HTML5, CSS3, SQL
Frameworks & ML: MobileNetV2, Ursina Engine, Deep Learning, Predictive Analytics, Data Structures & Algorithms
Databases & Tools: SQLite, Relational Databases (RDBMS), Git, GitHub, MS Office Suite, Graphic Design Basics

PROFESSIONAL EXPERIENCE

Computer Science Instructor

2023 – 2026

Avicenna Academy

- Delivered high-impact technical lectures on Python, C++, and CS fundamentals to 50+ students, boosting average success rates by 25%.
- Designed hands-on coding challenges, technical curriculum, and real-world project criteria for students.
- Mentored students through complex Data Structures, Object-Oriented Programming (OOP), and clean debugging practices.
- Supervised full project development lifecycle for students, ensuring seamless integration of code and presentation skills.

TECHNICAL PROJECTS

Diabetes Risk Prediction System

Python, Machine Learning, SQLite

- Engineered a predictive analytics application utilizing advanced ML models to assess patient health risk scores based on medical datasets; securely structured SQLite tables to log queries and outputs.

Face Emotion Detection System

Python, MobileNetV2, Deep Learning

- Built a real-time computer vision system capable of identifying human emotions through optimization of the MobileNetV2 deep neural network for efficient, low-latency live video streaming processing.

3D Battle Tank Game & Racing Simulator

Python, Ursina Engine, OOP

- Designed interactive 3D simulations integrating physics-based vehicle controllers, enemy AI movement logic, and environment boundaries written fully in modular Object-Oriented code.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2022 – 2026

Government College University Faisalabad | CGPA: 3.30 / 4.00

CERTIFICATIONS

- Computer Applications Certificate (PBTE):** Grade A+ (Score 94/100)
- Office Management Professional Certificate:** Grade A (6 Months)
- Web Designing Certificate (PSDF / PBTE):** Score 85%
- Foundations:** ML, Python, C++, and Web Development

Languages: English (Professional), Urdu (Native)
